

Welcome To Mirah

A smart system to track, document, and manage your herd.

How It Works ?

1

Add Animal Types & Breeds

Start by defining animal types and their breeds for better organization.

2

Register Your Animals

Add animals with full details including images, gender, birth date, and more.

3

Track Weights & Vaccines

Monitor your herd's health by recording weights and vaccinations.

Explore the System

Animal Types

Organize your animals into types like sheep, goats, cows, etc.

Animal Breeds

Classify animals further by breed within each type.

Animals

View, edit, and track all registered animals in your herd.

Ideal Weights

Define weight ranges by age, breed, and gender.

Vaccines

Set up vaccination schedules to keep your herd healthy.

About Mirah

"Marah" is an Arabic word that refers to the resting place for livestock after grazing — a safe, familiar space where animals gather, rest, and are cared for. Traditionally, it's a central part of pastoral life, reflecting care, routine, and connection to the herd.

Key Features:

- Animal registration with full details and images
- Dynamic breed and type management
- Weight record tracking and ideal weight comparison
- Vaccination schedule and monitoring
- User-friendly and responsive interface
- Cloud media storage integration
