User Stories

As a Livestock Owner,
I want to add different animal types and breeds,
So that I can classify my herd effectively.

As a Livestock Owner,
I want to register new animals with full details,
So that I can maintain accurate records for each animal.

As a Livestock Owner,
I want to add weight records for each animal over time,
So that I can monitor their growth and health trends.

As a Livestock Owner,
I want to define ideal weight ranges by breed, gender, and age,
So that I can compare them to actual animal weights.

As a Livestock Owner,
I want the system to alert me if an animal is underweight or overweight,
So that I can take action promptly.

As a Livestock Owner,
I want to define vaccine types based on breed, gender, and age,
So that I know which vaccines are required.

As a Livestock Owner,
I want to add vaccination records for my animals,
So that I can track which ones have been vaccinated and when.

As a Livestock Owner,
I want the system to compare expected vaccines with given ones,
So that I get notified if any vaccination is missing.

As a Livestock Owner,
I want to upload images for animals and documents for vaccines or weight,
So that I can have visual references and proofs.

As a Livestock Owner,
I want to easily search and filter animals by type, breed, or status,
So that I can quickly find the information I need.

As a Livestock Owner,
I want a responsive and easy-to-use interface on all devices,
So that I can manage my herd from anywhere, even on mobile.

As a Livestock Owner,
I want to view dashboards and summaries about animal statuses and records,
So that I can make informed decisions quickly.
